- Cute. Only recommend if you have a single 16:9 monitor, doesnt work well with multiple monitor set ups and ultrawide monitors. But for a single regular monitor, it works perfectly fine and adds nice customisation. wish there was a way to quit the program without crashing the desktop. support double or triple monitor pls!!!!

I cant find this but it really support on old version, on the newest version it only shows on my first monitor.. wish there was a way to quit the program without crashing the desktop
